Programa EMBRACE @climaespacial Atividade geomagnética

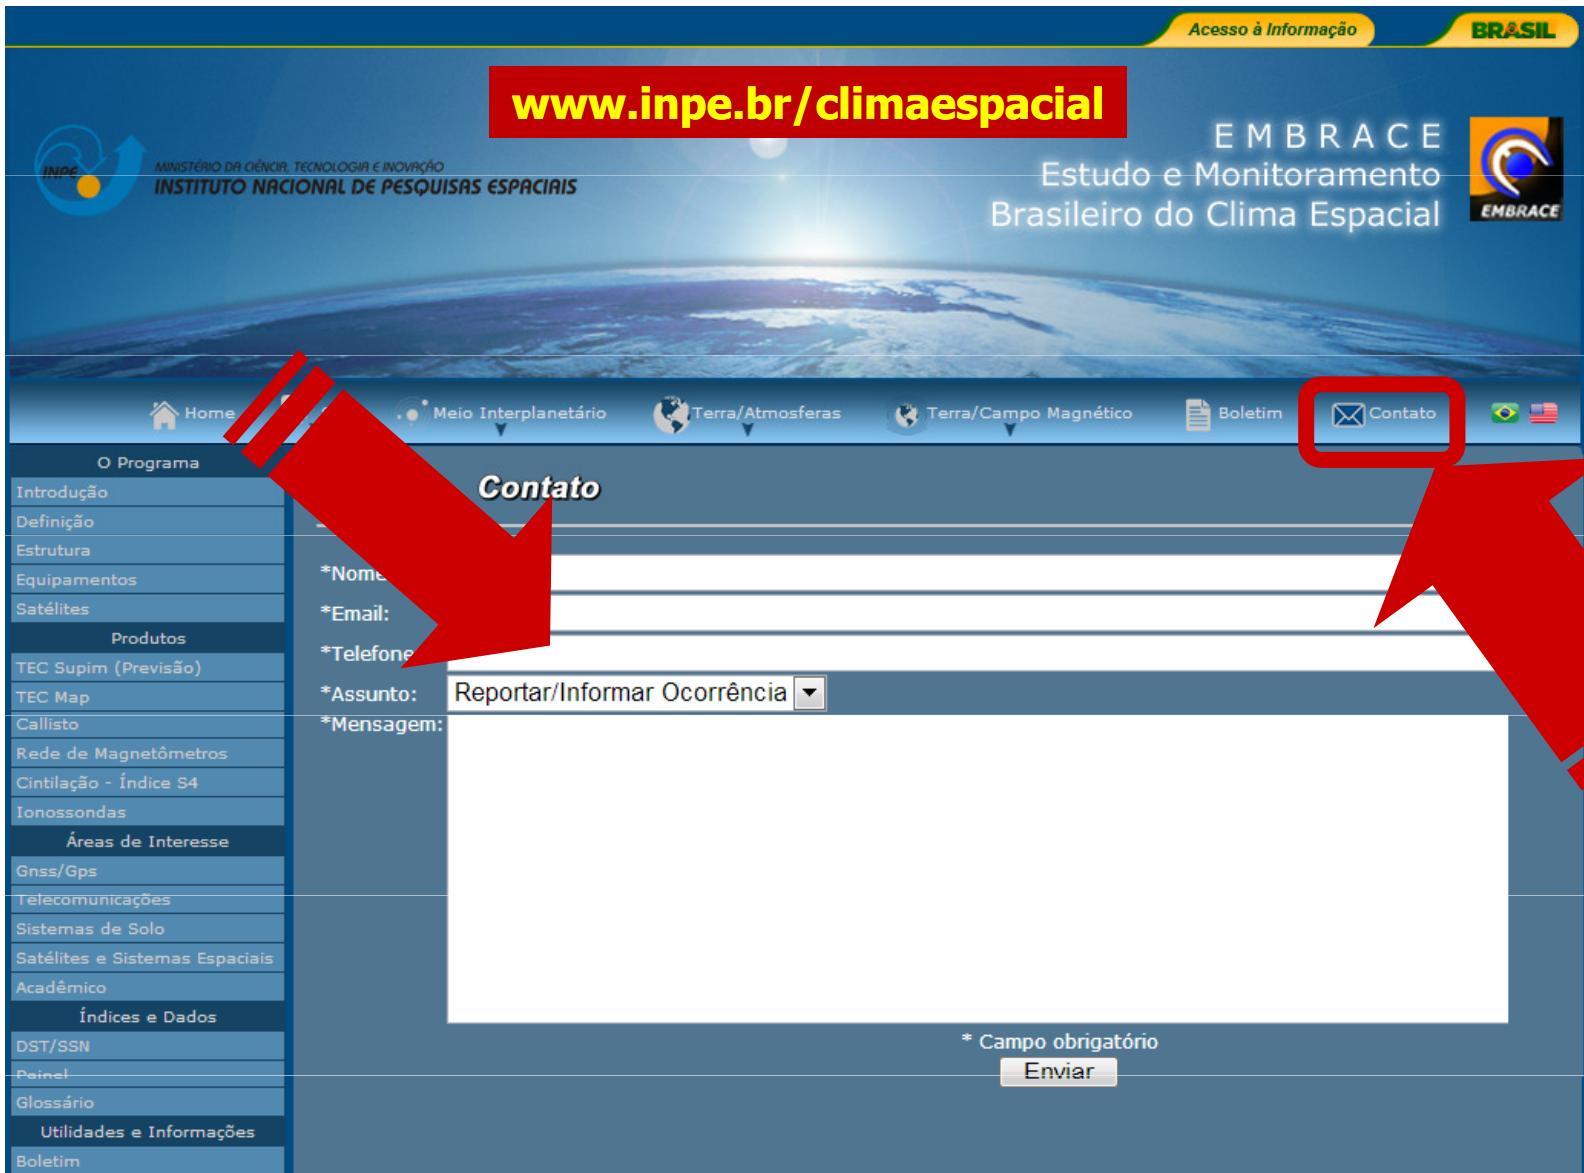

www.inpe.br/climaespacial

The screenshot shows the main page of the INPE Clima Espacial website. It features a large header with the INPE logo and the text "ESTUDO E MONITORAMENTO BRASILEIRO DO CLIMA ESPACIAL". Below the header, there are four main sections: "Sol" (Sun), "Meio Interplanetário" (Interplanetary Medium), "Terra / Atmosferas" (Earth / Atmosphere), and "Terra / Campo Magnético" (Earth / Magnetic Field). Each section contains a summary of current conditions and links to more detailed reports. The left sidebar provides navigation through various programs and services offered by INPE.

twitter.com/climaespacial

The screenshot shows the Twitter profile for the Programa EMBRACE (@climaespacial). The profile includes a bio stating it is a program created by INPE/MCT for the study and monitoring of the Brazilian space climate. It lists São José dos Campos, SP, and the website inpe.br/climaespacial. The profile has 1,495 tweets, 49 following, and 253 followers. The timeline displays several tweets from the account, including updates about solar activity, geomagnetic storms, and space weather events. The interface also shows a sidebar with "Who to follow" suggestions and a "Popular accounts" section.

The screenshot shows the 'Contato' (Contact) page of the INPE website. At the top, there is a banner with the URL www.inpe.br/climaespacial. On the right side of the banner, the EMBRACE logo and name are displayed. The main content area has a blue header with the title 'Contato'. Below the header, there are several input fields for contact information: 'Nome', 'Email', and 'Telefone'. A dropdown menu for 'Assunto' is open, showing 'Reportar/Informar Ocorrência' as the selected option. A large text area for 'Mensagem' is present. At the bottom right, there is a button labeled 'Enviar' (Send). A red arrow points from the left towards the contact form, and another red arrow points from the right towards the 'Enviar' button. The left sidebar contains a navigation menu with various links related to the program's activities.

Space Weather Product Portal

The WMO Space Weather Product portal offers near-real time access to a selection of space weather information products that are routinely generated by a range of space weather centres worldwide participating in the WMO ICTSW. Products are freely available on this portal for discovery, demonstration and training purposes. For operational applications, it is recommended to contact the providing centre in order to confirm the fitness for purpose, and define appropriate delivery mechanisms.

Ionospheric Total Electron Content Products

Total Electron Content over Brazil

Product Description:

This ionospheric product provides a measurement of the ionospheric total electron content (TEC) over Brazil. It is designed to estimate the signal delay for single and dual frequency GNSS applications. The map over South America displays TEC in color shade. The movie shows temporal variation of TEC from 00:00 UT to 24:00 UT of the previous day with the time interval of 10 minutes.

Target Users:

Key product users include industries relying on high-accuracy GNSS positioning: agriculture, surveying, construction, drilling, and scientific users.

The screenshot shows a web page titled "GEOMAGNETISMO" from the DGE-Divisão de Geofísica Espacial. The left sidebar contains links for "O GEOMA", "Área de Pesquisa", "Tecnologia Geomagnética", "Publicações", "Equipe", "Contato", "Projetos", "Campanhas MT", "Campanhas GDS", "SIPEG", "Resultados", "Sensor Hall", "Sensor Magnetômetro", "Dados GNSS", "Consultas", "Cálculo IGRF", "Cabo Frio 2000", and "Links Relacionados". A banner at the top features the INPE and AEB logos. The main content area includes a text box about Hall sensors, a "Traduzir" button, and a link to "Fonte: GlobalMag". Below this is a section titled "Dados atualizados em intervalos de 5 minutos - horário UTC" with two graphs: "Dia Atual" showing data from 00 to 23 UTC on October 7, 2013, and "Dias Anteriores" showing a calendar for October 2013 with specific dates highlighted. A call-to-action "Clique aqui para ampliar a imagem" points to the graphs. At the bottom, there is a "Calendários Anuais com os resultados" section for years 2009, 2010, 2011, 2012, and 2013.
